

## Are two eyes better than one Sight Experiment?

You will need;

2 pens or pencils

What to do.

1. Hold a pencil on its side (length ways) in each hand.
2. With one eye closed try to touch the ends of the pencils together. Did you miss?
3. Now try it with both eyes open. Did you miss?

Are 2 eyes better than 1?

What did you find out from doing this experiment?
